## **DETAILED ACTION**

### ***Claim Objections***

Claim 28 is objected to under 37 CFR 1.75(c) as being in improper form because a multiple dependent claim cannot depend upon another multiple dependent claim. In the instant case, claim 28 depends upon multiple dependent claim 19. See MPEP § 608.01(n).

Accordingly, the claim 28 has not been further treated on the merits.

### ***Claim Rejections - 35 USC § 112***

Claims 9 and 26 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 9 is unclear because it depends upon itself.

Claim 26 is vague and indefinite. With respect to Claim 26 the phrase "or similar" renders the claim(s) indefinite because the claim(s) include(s) elements not actually disclosed (those encompassed by "or similar"), thereby rendering the scope of the claim(s) unascertainable.

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-27 and 29-36 are rejected under 35 U.S.C. 102(b) as being anticipated by Skyba (U.S. Patent No. 5,429,321).

Art Unit: 3654

With respect to Claims 1-27 and 29-34, Skyba, Figures 1-26, teaches a storage device for use with at least one article, said storage device including a body, said body including at least one substantially elongate backbone 16 and at least one substantially elongate tine 17 interconnected thereto but separated there from by a defined distance to form a channel adapted to receive the article positioned therein, and further including supporting means attachable to said body; a latching apparatus 40.

With respect to Claim 35-36, the method described in these claims would inherently result from the use of the storage device of Skyba as advanced above.
